100 Questions Answers About Valvular Heart Disease 100 Questions Answers About Valvular Heart Disease

MEDICAL SU NUR2301 Med surg exam final Questions And Answers

Is 55 too low on the Diastolic for blood pressure?
Aug 11, 2013 · A heart murmur is not normal, and changes in your blood pressure could signal worsening of a heart valve problem. Many patients with aortic valve regurgitation have a low diastolic blood pressure. At the very least, they could do an echo (ultrasound of your heart) and keep tabs on your ventricular and valvular function.

A quivery heartbeat or flutter in your chest: two telltale signs you could be in atrial fibrillation, or AFib. That means your heart is beating out-of-sync. As weird or scary as an episode may feel

Atrial fibrillation - Symptoms and causes - Mayo Clinic
Oct 19, 2021 · Atrial fibrillation (A-fib) is an irregular and often very rapid heart rhythm (arrhythmia) that can lead to blood clots in the heart. A-fib increases the risk of stroke, heart failure and other heart-related complications. During atrial fibrillation, the heart’s upper chambers (the atria) beat chaotically and irregularly — out of sync with the lower chambers (the ventricles) of the heart.
